

Please do not support Low Power FM to the detriment of Translator services. Although I am sure LPFM has many great uses, it cannot replace the power, sense of community and listening enjoyment I get from my local K-LOVE station. K-LOVE broadcast on 106.7 FM in the north central Piedmont of NC in the Greensboro-Highpoint and Raleigh-Durham MSAs. There is NO local comparative station. Their programming is irreplaceable. K-LOVE's family oriented programs allow me to listen without worrying about off-color humor or advertisements. Local announcements are disseminated with cut-ins. The positive encouraging message from K-Love serves the public interests and should retain its priority position in every community. In conclusion, please do not give LPFM services priority over FM translators. The public is better served listening to quality programming from national shows like K-LOVE.
